

Document Management Simplified

HealthConnection Introduces the Departmental Document Management Solution for Small and Mid-Sized Practices

ELECTRONIC PATIENT DATA IS GROWING AT A STAGGERING RATE.

What used to be housed in a few oversized file folders now comprises a vast collection of forms, histories, images, and treatment records that must be kept private and available for longer periods of time. Factor in the current push for electronic medical record (EMR) systems that put critical patient information in the hands of clinicians when they need it, and you have a major challenge on your hands.

You need a document management system that incorporates key patient data into a single, secure record that is easily accessible across multiple systems and platforms. You also need a system that is easy to integrate into your current infrastructure and won't strain your limited IT resources. You need HealthConnection.

The HealthConnection Document Management Solution provides what you need to implement state-of-the-art document management in your practice. It even includes installation and maintenance services, ensuring you get up and running quickly and continue to enjoy maximum efficiency down the road.

HealthConnection Makes It Easy to Bring the Benefits of Document Management to Your Practice

- Shrink paper-overhead costs
- Speed up billing and collections
- Simplify HIPAA compliance
- Support easier EMR integration
- Access patient data immediately
- Protect patient privacy
- Limit access and create an audit trail
- Reduce off-site storage costs

A PC CONNECTION BRAND

Document Management in

HealthConnection offers pre-configured document management solutions. These end-to-end bundles include all the hardware, software, and support services you need to get up and running. The complete solution includes scanning, indexing, archiving, retrieval, workflow, and integration support for key departmental applications.

Secure, Manageable Data Repository

All data is indexed and organized according to customizable rules. Patient records, back-office reports, audio notes, X-rays, and more are protected against loss or misplacement.

Instant Access to Accurate Files

Up-to-the-minute documents and information are instantly available to doctors and authorized staff, increasing productivity, reducing errors, eliminating administrative delays, increasing patient satisfaction, and easing the burden of HIPAA compliance.

Proven ROI

Document management systems can increase productivity 25% to 300% and enable you to redeploy valuable resources to other mission-critical areas. You benefit with an almost instant return on investment.

Robust Functionality

An easy-to-master user interface is backed by iSynergy Server software, making the HealthConnection Document Management Solution the most powerful information-management system on the market.

HL7 Interface

The Process Automation Suite (iPAS) supports automation of healthcare documents, content, and processes to take full advantage of the shared information protocol provided by HL7. Departmental applications benefiting from HL7 include patient billing, records management, and various clinical systems.

Top 5 Advantages of the HealthConnection Document Management Solution

1. Cost Reduction

Eliminate both unnecessary manual processes and time-consuming searches for patient records, test results, insurance reports, asset files, and other documents. Maximum value can be realized by using advanced recognition techniques (automatic document sorting, OCR, ICR, and bar code recognition).

2. Increased Productivity

Access information instantly as well as optimize and automate tasks for an improved quality of care. Cumbersome processes, like billing review and reconciliation, are completed in minutes. Paperless prescription reviews, approvals, and comments can be shared across departments or between offices instantly.

3. Enhanced Information Sharing and Collaboration

Multiple patient files can be viewed at the same time with just the click of a mouse, enabling you to see diagnostic reports alongside pre- and post-operative X-rays or other data. Provider-to-provider consultations are more effective when both parties can view the same information at different locations.

4. Seamless Integration

Easily integrate your current practice management software with the Document Management Solution to automate intake forms, patient charts, insurance cards, claims, transfers, HR records, and other healthcare applications.

5. Increased Security

Protect and maintain the integrity of patient information throughout the entire process by providing control at the document and process level. The Document Management Solution enforces security policies and procedures and ensures HIPAA compliance by maintaining a complete trail of all user interactions.

One Complete Package

Our Document Management Solution Is Built on Scalable Hardware and Top-Brand Components

Start with the size you need today and easily expand as your practice grows. HealthConnection Document Management Solutions are scalable and expandable no matter which configuration you choose. Start with a five or ten concurrent-user system, and we'll help you grow from there.

	5-User System	10-User System
Processor	Intel® Pentium® 4 (2GHz)	Intel® Pentium® 4 (2.80GHz)
Memory	2GB	4GB
Storage	RAID 5	RAID 5
Video	XGA (1024×768, 256 colors)	UGA (1600×1200 16K colors)
NIC	10/100	Dual 10/100
CD-ROM/FDD	4X/1.44MB	24X/1.44MB
Sound Card	16-bit On-Board	16-bit On-Board
Operating System	Windows 2000/2003 Server	Windows 2003 Server
Web Software	IIS	IIS
Remote Access	Go to my PC	VPN

All Software Comes Pre-Installed and Tested for Compatibility

The HealthConnection Document Management Solution is based around the iSynergy Suite by iDATIX, comprised of a variety of single-function modules that work together seamlessly to create a fully automated paperless information system.

- **iSynergy Server** is the heart of the HealthConnection Document Management Solution. It manages the flow of information while monitoring all activities, provides browser-based access to authorized users, and facilitates the storage and security of all data.
- **ScanSpeed Batch Scan Module** provides batch and interactive scanning and indexing. Completely integrated into iSynergy, this application can be used with barcode documents or separator sheets and requires no scripting or user programming.

- **iScan Encounter-Based Scan Module and Fax Capture** is also integrated into iSynergy and handles one-at-a-time scanning and indexing. It also captures incoming faxes for storage.
- **Multi-Function Service** provides connectivity to external image sources, including multi-function printers/copiers and fax servers.
- **Data Exchange Service** allows data to be passed between the iSynergy database and any existing ODBC compliant database. This application automates the indexing process as documents are captured and sent to the iSynergy repository.
- **Full Text Indexing Search** enables powerful searching across all documents in your iSynergy system.
- **Bar Coder** increases productivity of document capture by automating the indexing process.
- **xTractor** (Optional) is an additional tool that further eliminates manual data entry from document capture and indexing.

Customize Your Solution with a Choice of Scanners

It is important to select the right scanner and implement the correct processes to maximize the benefits of your new system. The Document Management Solution is compatible with more than 350 scanners right out of the box. Your Account Manager is ready to help you select the right scanner for your environment and document volume.

The Best Feature May Just Be the Savings

The HealthConnection Document Management Solution can produce immediate, significant cost savings by improving productivity, quality of care, regulatory compliance, and security while reducing the expenses of filing, storage, distribution, shipping, and other labor associated with medical record processing. All it takes to get started is a phone call.

We're here for you. Call today for expert guidance in choosing the right Document Management Solution for your practice.

Complete Document Management Is Just a Phone Call Away

The ready-to-install HealthConnection Document Management Solution provides superior performance and scalability, delivering rapid and accurate access to an unlimited number of digitized patient documents, electronic forms, faxes, email, and other media to multiple authorized users. It securely and permanently stores critical healthcare information in a robust and highly available environment to safeguard critical content from disaster, misuse, or loss. Best of all, it's fully configured and compatibility tested.

Installation and Maintenance Are Included

Your HealthConnection Document Management Solution includes on-site installation and configuration from Cranel Imaging, the leading value-added distributor of document imaging, storage, and duplication products and services. It also comes with an annual maintenance contract that includes all of the following:

- Unlimited phone support
Monday – Friday
from 8:00a.m. – 5:00p.m.
- Ongoing distribution of
applications fixes and updates
- Major application upgrades
when applicable
