7,943,529

Jose Feroso of *Wired* answered questions from tech enthusiasts for washingtonpost.com, which included the Toshiba's Portégé R500 during the online blog session.

When asked for a recommendation for a laptop that is fairly lightweight, would have storage for music and photos and wouldn't break the bank, Feroso responded, "Two ultralights that are not as expensive, but have similar features are the Apple MacBook Air and the Toshiba Portégé R500, which run up to \$2,000 or so. They have great designs, and are powerful."

The Toshiba Tecra M9-S5515 was featured by the editors of *PC Today* in a product review of "technology to go."

"The idea of a notebook having innovative features isn't novel but the fact that a notebook can come loaded with the latest features in a package that's business and travel ready is worthy of attention. That's the case with Toshiba's Tecra notebook family and in particular the small durable Tecra M9 55535," wrote *PC Today* editors.

"What's more, this notebook sports a reasonable price tag and a base configuration that doesn't need any tweaking to deliver the power and flexibility you need," noted the editors. "The 14.1-inch widescreen display and outstanding graphics combined with Windows Aero create vibrant imaging."

Cisco Cheng included the **Toshiba's Portégé R500** in PCMag.com's "Back to School: Lighten up With an Ultraportable!" roundup.

Impressed with the keyboard, Cheng wrote, "As a general rule, you'll want a full-size keyboard that measures at least 18.5 centimeters from the 'Q' to the 'P' letter keys ... The **Toshiba Portégé R500 (SSD)** gets the keyboard right."

"If you've always wanted a budget-friendly laptop that breezes through all your common computing tasks, then take a look at the **Toshiba Satellite A305D-S6835**," wrote Daniel Gonzales of TigerDirect News in his review.

"You'll see that its (**Satellite A305D-S6835**) bold, fresh lines and glossy, metallic blue finish make other laptops look pale in comparison ... Plus, the laptop is very easy to carry around, with a weight of just six pounds."

Highlighting the audio features of the **Satellite A305D-S6835**, Gonzales wrote, "Harman Kardon stereo speakers enliven your multimedia experience so much more by delivering awe inspiring sounds."

"In terms of performance, the **Satellite A305D-S6835** gets two thumbs up."

Toshiba's Satellite U405-S2830 was included in a roundup of the "Best PCs on Campus" in *PC Magazine*.

Listing the pros of the Satellite U405-S2830, *PC Magazine's* editors wrote, "Impressive performance scores, Sleep-and-Charge USB ports, 3GB of memory, internal optical drive with LabelFlash technology, and the Fusion finish works well with LED-lit media control buttons."

"The (Satellite) U405 (-S2830) is a completely redesigned mainstream laptop and is priced competitively for those heading back to school."
